

This folder contains the computer programs and data for the paper: **“Valid and Efficient Inference for Nonparametric Variable Importance in Two-Phase Studies”** by Guorong Dai, Raymond J. Carroll, and Jinbo Chen.

- `dat.RDS` includes the data set used for the analysis in Section 3.2 of the manuscript.
- `TPD_functions.R` contains the functions used in our numerical studies.
- `TPD_run.R` and `Data_run.R` provide the code for the simulation studies and real data analysis, respectively.
